

## Instructions to Adhere Suede Heel Wraps

There are 2 ways to wear the suede heel wraps.

Option #1: Ensure that the suede wraps will be situated as shown on the photo at right. The thicker extending flap will wrap the straight side of the heel.

Place the suede wrap onto the bottom of the heel fittingly and fold the flaps onto the neck of the heel.

Fold all extending suede flaps so to meet the neck of the heel.

After the fold, bound the suede wrap to the heel with a rubber band.

This option allows for the easy removal and reapplication of the suede wrap when desired

Option #2: Place the suede wrap onto the bottom of the heel aptly and carefully snip off the extending flaps. Trim in a curving manner for areas that curve and straightly on areas that are straight for optimal fit.

Trim in a curving manner for areas that curve and straightly on areas that are straight for optimal fit.

The cut out of the suede wrap should properly fit atop the heel fittingly.

Then simply apply shoe glue, or some of our customers prefer, super glue and adhere onto the heel as shown on photo.

This method does not allow for the removal of the suede piece.
